Common statement of PragoBoard s.r.o. & PragoBoard GmbH to current actions

Dear sirs,

Corona pandemic has fully reached Europe and largely brought it to a standstill. At PragoBoard we feel the need to present our measures transparently to you. We would like to contribute to slowing the spread of the infection and to give our employees the greatest possible security over the next few weeks:

- Obligatory transfer of appointments to digital communication channels. Visits are temporarily not received and made.
- All employees whose tasks allow work from home have been ordered to do their work from there, to visit the production site only in exceptional cases that have been agreed beforehand and cannot be postponed.
- Offering flexible working hours with a generous offer of minus hours that employees can use for themselves if required.
- Production was switched to a multi-shift system and the cleaning intervals were increased. This reduces the number of employees per shift and thus also points of contact and risk of infection.
- The employees were advised to avoid public transport as much as possible and not to use it for the commute to work. The company provides a free shuttle service for this.
- The possibilities of individual cleaning within the company were increased and additional disinfection stations were setup at entrances and departments. The wearing of protective masks was ordered within the company.
- We have sensitised the employees to voluntarily isolate themselves within the scope of the options to temporarily refrain from moving. The company makes it clear to employees that large-scale spreading can no longer be prevented, but with these measures we are giving doctors, scientists, hospitals and supporting institutions more time by slowing the spreading.

PragoBoard is currently not affected by any infection. Our production is currently running under a high level. We strive to continue to deliver to our customers in the best possible manner and on time, but we ask for your understanding today that delivery times may increase. This is due to the very high production utilization combined with the greatest possible flexibility of employees during this crisis.

If you have any question about the situation at PragoBoard, please contact us, we will be happy to answer them.

Best regards

PragoBoard s.r.o. & GmbH
